

HEALTH EQUITY SOLUTIONS

Listening Sessions 2020

To inform our 2021 legislative agenda, Health Equity Solutions conducted 8 listening sessions across Connecticut, with a total of 92 participants from 37 towns/cities. After a brief introduction, participants were assigned to break out rooms to discuss the issues they saw as most important when thinking of health equity and health care. Participants then presented a summary to the whole group and took a poll to mark their top three priorities among all topics discussed. Below are topics most frequently discussed across all listening sessions.

Listening Sessions 2020: Major Topics Discussed
